

High Security Portable Fence Systems
\& HVM Barriers

## Security Fencing

ARX Security Fencing is a fully scalable and versatile portable fencing system. Built to the very highest standards of security,

ARX 12 ' ( 3.65 m ) perimeter security fence (3 panel)

This includes protecting property and/or people, ensuring H\&S protocols are maintained and to assist with operational continuity.

## Components \& Build

Assembling temporary perimeter fencing has never been so easy.
 anti tunnelling. unable to be moved or tampered with.

## Higher Level Security \& Optional Extras

The versatility of the system allows you to build different set-up combinations.

4' (1.2 m) Extension Post ARX-ASSY-004
Extend the height of the fence from $8^{\prime}(2.4 \mathrm{~m})$ up to $12^{\prime}(3.6 \mathrm{~m})$ using the extension posts and the universal $4^{\prime}$ ( 1.2 m ) Panel ARX-ASSY-003.

12' (3.6 m) Brace Leg ARX-ASSY-011
Designed to add even more structure and rigidity to the overall build of the fence to protect against rapidly high winds and mob attacks.

8' (2.4 m) Post Infill Panel ARX-ASSY-013
4' (1.2 m) Extension Infill Panel ARX-ASSY-014

Adds extra safety by securing the gaps between each module.

## Razor Wire Bracket

ARX-WELD-013
To help prevent against scaling the fence, the Razor Wire Bracket option secures directly on top of the Main Post using M12 $\times 25 \mathrm{~mm}$ bolts.

8' (2.4 m) Pedestrian Gate Panel ARX-ASSY-020

For means of access from the secure side of the fence. This can be added into your set-up wherever required.

8' (2.4 m) Corner Post
Most set-ups include an array of straight runs, but our Corner Posts can be utilised to offer even more flexibility.
